#### **DESCRIPTION**

#### **Objectives:**

- **1**. **Growth prospect of Ecommerce:** E- commerce offers tremendous benefits, convenience, speed and comfort.
- **2. Economic Growth:** Driving India's growth story by making India a better place by expanding knowledge through Research, Technology and innovation.
- **3. Foreign Direct Investment:** Government commitment to attracting foreign direct investment while maintaining "fair play and Honesty for both customers and suppliers.
- **4. Developed India:** In 2047, as India celebrates 100th year, there is a vision of a developed India through trade agreements with other nations and the expansion of businesses

#### **Key Takeaways:**

India will be a developed economy in 2047. The government has a vision of encouraging the growth of online businesses and at the same time ensure that small retailers survive and co-exist with online services.

**Investment Strategies**: The government wants "fair play and honesty for both customers and suppliers" while luring in foreign direct investment. The government also want to encourage the growth of online business without disturbing the existence of small businesses in India.

**Cause for Concern:** India's retail trading sector attracted US \$ 4.63 billion FDI's between April 2000- March 2024. E commerce rapid growth is a cause of concern and not pride because it could lead to job losses in traditional retail. Due to huge demand of online businesses there is risk of losing jobs of small retailers in India.

**Foreign Direct Investment:** Excessive FDI in retail sector is not good for the growth of the nation as it will create threat to small retailer's in India.

#### **Learning Outcomes:**

- **1. Market Trends and Opportunities:** Insights into current market trends, emerging industries, and opportunities for growth in various sectors.
- **2. Government support for FDI:** Information about new government initiatives, schemes, or incentives designed to support FDI and specific industries.
- **3.** Challenges and Solutions: Awareness of the key challenges facing the commerce and industry sectors and the proposed solutions or strategies to address them.

- **4. Global Trade Relations:** Knowledge about the country's position in global trade, including trade agreements, tariffs, and international relations.
- **6. Economic Goals and Vision:** Understanding the long-term economic goals and vision of the government, including plans for economic development and industrial growth.
- **7. Impact on Businesses:** Insights into how government policies and decisions will affect various types of businesses, from large corporations to small enterprises.
- **8. Innovation and Technology:** Information on how the government is supporting innovation, technology development, and digital transformation within industries.

#### **FLYER OF THE EVENT**
