

A Workshop to teach SEED PEN at Dharwali IT park

A workshop was conducted on 14th July 2018 at Dharwali IT Park to teach the concept of recycle, biodegradable products and pollution.

Purpose

- The workshop was conducted with an aim to distribute seeds to the kids and teach them to minimize plastic in their daily life from the objects they are using.
- To teach creativity and develop the motor skills of the kids.
- To equip them with entrepreneurial skills.

What is a SEED PEN?

A seed pen is a pen made up of paper decorated with paper flowers, fish, bird etc. The flower and the animals will remind the kids not to disturb the nature and use biodegradable things only.

Material used

Pen Refill, Paper, Fevicol, Gulmohar Seeds, Scissors

Conclusion

The kids understood the concept of recycling and pollution and revealed that they will use the pen for completing their homework. Overall, the workshop was success.

Future Scope

The students can make more seed pens on a regular basis, keep a stall in college festivals and promote it by selling it to college students.

Resource Person

1. Dr. Shubhi Lall Agarwal, Assistant Professor, AIMS
2. Prof. Samuel Jacob, Assistant Professor, ACET

A Workshop on Paper Bags at Dharwali IT Park by Atharva Foundation

A workshop on paper bags was conducted under “Swachh Bharat Abhiyaan” at Dharwali IT Park by Dr. Shubhi Lall Agarwal and few students to teach the importance of recycling and reuse of paper. The kids of the village designed paper bags and took a pledge to avoid plastic material in their daily life. These paper bags will be displayed in the college premises in upcoming events in 2018 as a strong message to keep India clean.

shubhilall.simplereminders Looking at their involvement into learning, all I can say is teaching the so called poor India makes me feel that I am the richest person on this planet because at the end of the day, these students want to make the most of it. Their concentration level is very high and their will and attitude is outstanding!

shubhilall.simplereminders Understanding the menace created by plastic and over dependency on it ...can bring some peace in our society. Paper bags can bring a substantial change in the society. The concept of #recycle and #reuse must be taught at the grass root level. A big thanks to Shri Sunil Rane Ji and Upasna for giving me chance to meet these little angels in their IT Park at Dharwali Village.

A Workshop to teach Needle Work and Paper Craft

A REPORT

The faculty members of AIMS conducted a workshop on 14th July 2018 to teach the kids at Dharwali IT park.

Objective

- The aim of the workshop was to teach the basic needle work and paper cutting to the kids.
- To teach them certain skills which can be developed into profession later.
- To give them exposure of all the things involved in the making an outfit.

Methodology

The students were divided into two groups according to their areas of interest.

Group 1: This group was given cloth, needle and thread and stitched their skirts. Two girls were identified as fast learners and few of them were slow learners who will complete their skirts in the next session. All girls were interested in needle work and wanted to learn more.

Group 2: This group was of kids up to the age of 10 years and they were interested in paper craft. They created folders out of old newspaper and ice cream sticks. They were found inquisitive and grasped the folds and the tricks very easily. They will be tested for the same product in the coming sessions.

Faculty Coordinators:

Dr. Shubhi Lall Agarwal

Prof. Nidhi Shah

Conclusion

The workshop was an effort to reach the underprivileged and shape their minds towards constructive creativity that can be of some use in future for them. They enjoyed the workshop and insisted the teachers to visit again and give them some more such lectures.
